

Optec Launches Enhanced Mini 1.2mm Cable Assembly that facilitating 60% Increase of Cable Density

HONG KONG, August 28, 2013 - Optec Technology Limited, a leader in fiber optic interconnect and assembly products, today announces the availability of Enhanced Mini 1.2mm Cable Assembly.

Due to the ever increasing needs for wider bandwidth and faster speed in data transfers, all engineers in handling structured cabling projects are facing one big problem: tighter space, more fibers. The new launch of Enhanced Mini 1.2mm Cable Assembly is designed for tackling such cabling-congestion problem.

Without compromising any mechanical performance in particular pulling force, this revolutionary 1.2mm cable assembly provides appreciable size and weight advantages over conventional 2.0mm cable, which dramatically save more than 60% of the precious network space.

By occupying less space in raceways, the new 1.2mm cable assembly could soothes the cabling-congestion problem and to serve better air-flow for making a decent patching environment for the whole network.

This brand-new assembly solution is virtually suitable for all space-constrained indoor environments such as data centers, public and private networks, equipment distribution areas, storage systems, DWDM systems, cross-connects and switching systems.

Please visit www.optec.com.hk for more information about the Enhanced Mini 1.2mm Cable Assembly.

Cable Structure with 1.2mm diameter :

- ✓ Ultra small 1.2mm jacket cable
- ✓ Save more than 60% of space
- ✓ Uncompromising pulling face

About Optec Technology Limited

Optec Technology Limited is the world's leading fiber termination solutions provider which serves extensive optical networks throughout public and private sectors. Its wide variety of multifibers products includes board mounted solution for embedded optical modules, high-density 40G/100G applications, to MT-based outdoor harsh environment solutions. Please visit www.optec.com.hk for more information.
